ABOUT CAPTUS SYSTEMS
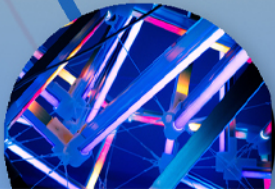

Connecting All People To Unified Solutions

CAPTUS SYSTEMS

What's Important To You Is What's Most Important To Us…

Exceptional **AUDIO** quality, crystal-clear **VIDEO**, **PEOPLE-FRIENDLY** solutions, unparalleled project management, and extraordinary customer service throughout.

Captus Systems is the **FIRST** Audio-Visual Design Company founded to approach Audio-Visual Projects from an IT core. We are an Audio-Visual Design, Engineering, and Build Firm that leads with Technology - and Delivers with People, High Ethics, and Professionalism. We have the expertise to design and deliver AV, IT, and Unified Communications Systems ANYWHERE.

WELCOME TO AV 2.0!

Hallmarks of a Captus Systems Audio + Video Conference Room are:

- Perfect Audio – everyone on a call can be heard with crystal clarity, no matter where they are
- Perfect Video - camera angles are set-up so that meeting participants appear to have a seat at the table
- People-Friendly – calls can be scheduled to connect, based on calendar invitations
- Good Looking – beautiful design that always includes no visible wires. We create for YOUR unique requirements

CAPTUS SYSTEMS

Make Your Voice Heard…CLEARLY

While every microphone is not perfect for every space, Captus Systems will help you select the correct microphone for the room, based on all possible variables…ceiling height, number of persons in the room, wall and floor coverings, etc. Innovations in microphone technology mean that the future of mics will be as networked devices. Captus Systems believes in the power of the network, and now the microphone is becoming a part of the IoT (Internet of Things) family.

DANTE – (Digital Audio Network Through Ethernet) is a combination of software, hardware, and network protocols that deliver uncompressed, multi-channel, low-latency digital audio over a standard ethernet network cable, using Layer 3 IP packets. To Captus Systems, DANTE means that microphones can be easily and cost-effectively deployed to provide the best user-experience available today.

Ceiling microphones that fit perfectly into a 2'x2' tile have the power of over 100 traditional microphones. When these are combined with algorithms programmed into the latest DSPs (Digital Signal Processors), the result is a speaker heard with uncompromising perfection…and PERFECTION is what we always strive for!

CAPTUS SYSTEMS

Captivate With Video

The use of **Video** has become ubiquitous for corporate communication. Whether implementing a video codec (using Cisco, Polycom, LifeSize), or a PC-based solution (using Skype for Business, ZOOM Room, Vidyo), or just calling into an audio bridge - every user experience is the same. Captus Systems ensures that the VIDEO in your conference room will perform as intended, and will EXCEED all expectations!

Go Bright Or Go Home!

Also on the video front are Digital Signage & Video Wall Displays – both of which have the power to captivate. And - both have many applications - like Reinforcing Brand, Announcing Upcoming Events & News, and Welcoming Participants to your gathering.

Captus Systems knows that the aesthetic matters most where video is concerned. We'll get you the perfect technology for your use, so that the power of your content will be delivered to the appropriate audience throughout your enterprise.

CAPTUS SYSTEMS

People-Friendly:

Do you work the same way you did 10 years ago? Of course not! *The Harvard Business Review* surveyed business leaders worldwide about how collaboration is changing within their organizations. 72% of those polled said that they're investing in "easier to use" collaboration solutions – because 64% asked reported that collaboration with external parties has "increased in importance."

At Captus Systems, we believe in Technology that puts **People-Friendly** at the top of the list, so you can focus on what really matters.

Collaboration is changing...

With platforms like Cisco Webex, Skype for Business, Zoom, and others – you'll be collaborating seamlessly in no time! Captus Systems offers training for everyone on your team, so you'll be left with no questions or confusion about how to implement your new technology.

CAPTUS SYSTEMS

Deliver Well:

Captus Systems' Team designs and delivers cost-effective Audio Visual and IT solutions for the world's leading companies and organizations in the Healthcare, Media, Technology, Corporate, Higher Education, Entertainment, and Legal sectors. We have more than 120 years of combined industry leadership experience on our Team, which allows us to pass-along our expertise and knowledge to our customers so we can always deliver **SUPERB RESULTS.**

AV 2.0

Captus Systems consistently exceeds expectations by using technology-proven best practices and processes, so we can value-engineer and deliver **AV 2.0.**

Captus Systems = Converging Solutions + Streaming Brilliance

Yeah. We've got this!
