REFILL REQUIRED/EMPTY

KEY FEATURES - AUTO-DISPENSER SENSOR

To ensure surface contact is kept to a minimum, we have also incorporated a sensor that automatically dispenses the sanitizer when a hand is detected.

1 - BORDER COLOR SHOWS BLUE WHEN NOT IN USE

2 - BORDER COLOR CHANGES TO GREEN WHEN HAND IS DETECTED

3 - BORDER COLOR RETURNS TO BLUE WHEN HANDS ARE REMOVED

EASY REFILL

When the sanitizer does need to be refilled, the process is quick and easy to ensure downtime is kept to a minimum.

Simply unlock the display, open the display, open the sanitizer cover and add your sanitizer of choice!

1 - OPEN THE DISPLAY

2 - REMOVE COVER

3 - REFILL SANITIZER TYPE (LIQUID/ALCOHOL/GEL)

FREQUENTLY ASKED QUESTIONS

What type of sanitizer is compatible?
Either liquid or Gel is fully compatable - and Foam will also be compatible starting in July of 2020

What is the capacity of sanitizer than can be held?
5000ml /1.3Gal. The larger capacity ensures refills are needed less frequently, saving time for staff on the ground

How does the cost compare with a standard Purell solution?
While the initial purchase is obviously higher than a cheap Purell sanitizer dispenser, aside from the aesthetic benefits of providing customers a dedicated sanitization station, it also actually works-out cheaper over a relatively short period of time. Purell-type devices use proprietary canisters which become expensive and need replacing frequently. Our solution allows you to use any liquid or gel you wish, which takes the average cost per dispense down from 3¢ to 1¢...and that adds-up to considerable savings over time

Is this made of metal or plastic?
The unit is a full metal construction, delivering a sturdy industrial-strength product that is built to last

Is the sanitizer dispensed automatically or via a hand pump?
Our solution automatically dispenses the sanitizer, which is completely contactless - preventing risk of infection via a hand-pump operation

What is the brightness of the screen?
500cd/m2 or twice as bright as the typical home TV. It is designed for commercial applications

How is content updated?
Content can be updated in a variety of ways, and differs slightly depending on the model selected (Gold or Platinum). Both units feature USB update capability, making it quick and easy to update images and videos via a USB stick - which is ideal for small deployments.

Our Platinum model also features a built-in Android PC with Android OS, enabling you to install a networked signage platform so you can centrally manage content updates

What version of Android OS is installed - & can I install my own APP?
The Platinum model runs Android 7.1, and yes, you are free to install any compatible Android APK.

Do you offer a cloud-based CMS platform?
YES! Due to the cost increase that it would put on the units, we made a conscious decision not to include our Enterprise grade CMS, which has been used by businesses around the world for the last 7 years. However, we are about to launch CMS Lite, which will be available for subscription, *(costs TBD)*, for all users of the platinum units. The Lite version has been designed to be priced low, in order to provide a cloud-based option to our customers

What is the warranty period?
2 Years

How do I know when the sanitizer is running low?
We have built-in an easy-to-identify method via our LED light indicators. Once Liquid or Gel sanitizer is added, the light bar turns green - identifying that the unit is ready. As soon as the LED indicator turns red, it's almost time for a refill. This makes it ideal for a busy commercial environment, so that staff can quickly identify when a refill is needed before the unit runs out

Is anything else included?
For our Platinum customers, we also include 6 pieces of professional content straight out of the box, to get you started. These include 3 JPEG's & 3 Animations, to ensure that you have professional content right from the start

Does the unit feature Wi-Fi?
The Platinum model features built-in Wi-Fi and LAN connectivity

Why do I need a fixed solution like this?
Unfortunately one thing that's certain is that the world has changed - and how a business takes care of their customers and employees will be a determining factor in their future success. Many studies have been done confirming that the vast majority of businesses will choose to spend their money only where they feel safe, & hand sanitization is at the heart of this, & is becoming mandated by governments around the world as our"new normal" emerges.

This is not a 3-month fix, but something that will be expected for the foreseeable future. Keeping that in mind, investing in a professional feature that not only provides the sanitization needed, but also provides you with the ability to communicate to employees and customers to reinforce your brand commitment to their safety & well-being, is vital.
